

VERIFICATION SERVICES

COMsolve provides Quality Assurance and Quality Control for cellular networks and fiber installations. Our teams specialize in site audits, ensuring that installations are done per industry best practices, standards and safety guidelines.

Since 2009, COMsolve has been providing cellular drive testing to tier 1 carriers and equipment vendors across Canada and the USA, collecting cellular signal and post processing to assist planners in improving network performance.

AVAILABLE SERVICES

Based on strict industry standards, our teams provide the following RF Analysis expertise:

- Cellular RF Drive and Walk Testing
- Post Processing Analysis
- RF Interference Troubleshooting

Trained Auditors are provided to Carriers and Equipment Vendors that specialize in:

- Site Auditing
- 3rd Party Auditing of Installations
- QA and QC Audit
- Efficient Real-Time Feedback
